**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over US 4,435,179 to Walker. Walker discloses a blood bag 1 with clear sides and a liquid therein. The bag comprises a connecting device or a cannula, 5, with a communicating portion or fluid delivery means 7. The device further comprises a hollow tube 3 and a break-off portion 8, that may be tinted, connected to the tubing via a weakened fracturing area 9. The break-off portion may have a lower specific gravity of the fluid in the bag, allowing it to float when broken off. See columns 2-3. Walker does not specifically disclose a liquid barrier seal and a piercing end, but he discloses such devices in column 1. Therefore, such an embodiment is within the contemplation of the inventor, and it would have been obvious to one of ordinary skill in the art at the time of invention to add a liquid barrier seal and a piercing member to the disclosed Walker apparatus in order to preserve the sterility of the bag and allow the connector to breach the seal.
